

## Some of our recent Maths activities in Rang a Dó.

### Money

We discussed and examined the different coins and notes that we use here in Ireland. We learned and identified the countries that also use the euro. Some of the activities we did in relation to money was setting up a classroom shop, estimating how many coins in a set and calculating the correct total and played the 'More Money Maths Game'.

## Symmetry

This was a really enjoyable chapter. We identified items in our environment that had lines of symmetry. The children then carefully created their own mirror images. They all done an excellent job and this activity really highlighted the wonderful artists we have in our class.

# Symmetry

## Fractions

Fractions proved to be lots of fun when we created our own pizzas! We carefully divided our 'pizzas' into halves and quarters and the children chose toppings such as 'cheese', 'peppers', 'chicken' and 'ham'.

## Weight

This week, we have been learning about grams and kilograms. On Pancake Tuesday, we looked at our bags of flour and sugar, jar of Nutella and jars of sprinkles to identify how many grams and kilograms was in each. The children all played a part in preparing the batter and we estimated how many grams of flour we needed. The children really enjoyed making their pancake and some divided their pancakes into halves with Nutella and sprinkles on one side and lemon and sugar on the other! A great day had by all 😊
