

Rang a Trí

It has been a busy few weeks in 3rd class. At the beginning of November, we discussed how this month asks us to take the time to make an extra special effort to remember those who have passed away. Each child created and designed a candle with the names of those who had passed away from their families for our classroom display. The children done a wonderful job and we prayed for all the people that were mentioned by the children.

Science Week 2018

Our focus for Science week was magnets and magnetism. We all really enjoyed this topic and carried out a number of small experiments in the classroom. We also made a discovery in that our own euro and cent coins were attracted to magnets but the American coins were not - they use different types of metal! Some other experiments included testing a variety of items from the classroom to see if they were attracted to magnets or not and taping a magnet to the top of some toy cars and moving them around using another magnet.

Attendance Plaque

3rd class won the attendance plaque for the month of November.

Christmas Art

We got a head start on our Christmas art this year as we wanted to have it up and ready for the run up to the festive season. The children were divided into groups and each had a task to complete. This included tracing and painting reindeers, painting Santa's sleigh and off course painting Santa himself! Constructing the mini town and wrapping the presents for Santa's sleigh. It turned out really well and the children have received lots of compliments for their display.

Kindness Baubles

Getting into the spirit of Christmas, we created kindness baubles in which each child picked a name from a hat (kept their chosen name a secret) and wrote kind words about their chosen person on the bauble. The children really enjoyed the element of surprise that went with this activity and seeing what their class peer had written about them.
